

ACA in Graphic Design & Illustration Using Adobe® Illustrator®

Creativity isn't an Elective Anymore, it's the Future

Today, it's not about what you know, it's about what you design. And with an entire generation growing up in a digital world, creativity is more important than ever.

With Adobe Certified Associate (ACA) certification, students gain the skills and proficiency needed to maximize their creative talents. As educators make industry-recognized certification available as part of their curriculum, students gain confidence and recognition as they certify the workforce skills and software knowledge needed to succeed in higher education and on the job.

Certification that Proves Illustrator Skills

Adobe Illustrator software is the industry's premier vector-drawing environment for creating scalable graphics. Workers are able to bring

their unique vision to life with shapes, color, effects, and typography by using a host of powerful functions to make fast work of their most complex designs.

As students plan careers in design, graphics, illustration, and related fields, the opportunities have never been greater, but the software skills required for these positions have to match. With Adobe Certified Associate certification, students tap into a formalized testing and certification track that helps train, test and validate important new graphics skills. Bottom line: a student with an ACA certification in Adobe Illustrator AND a great looking portfolio is going to make a powerful impression on a perspective employer.

Curriculum that Makes a Difference

Student certification goals are most effectively achieved as educators enhance their existing courses by incorporating Adobe Illustrator

ACA Exams Offer the Certification Students Need to Succeed

The Adobe Certified Associate exams provide the education and certification students need to succeed. For those pursuing higher education in the digital media field, this certification provides prerequisite knowledge and skills. For those ACA certified students seeking immediate employment in high demand areas of digital communication, this certification provides a valuable competitive edge.

Overwhelmingly, there was support for having [Adobe Certified Associate] as part of our curriculum. For industry,

this certification tells them that the students have an entry-level skill set in these areas. Employers would definitely want to see something like that for anyone they were considering."

Gerald Flim

Program Specialist for New Media Production and Design
SAIT Polytechnic

Previously, there was no way...to show proficiencies in these skills. Allowing students to take this exam gives us

an industry standard-a benchmark- and allows them to pursue careers based on these standards after they leave my class."

Trey Gore

Digital Media Technology Instructor,
Pearl-Rankin Career & Technical Center at Hinds Community College
